FAMOUS BATTLE SONGS.

men in an advantageous position and then started one of the songs of the church. This song began at the conchurch. This song began at the com-mencement of the battle, and so vocif-erously did the Britons sing the re-frain, "Hablelulah," that the bills, ech-olog with the sound, terrified their caemies and caused them to fiee in all di rections. This was called the ballein iah victory. The date is fixed by all historians at A. D. 429.

The second instance occurred on the 6th of November, 1792, when the French, under Dumouriez, encountered the Austrians at Jemmapes, in Belgium. The day was going dead against the French, when Dumouriez ran out to the front and raised the "Marseilleies". Forty thousand voices instantly inise." Forty thousand voices instantly took up the chorus, and, inspired by the magic of the battle song, the French railled and fell so furlously upon the Austrians that the tide of battle was completely turned and vic-tory given for defeat.—Pearson's Week

PIKE STREET EUROPEAN PLAN.

There are two instances on record of a battle being won by a war song. In the fifth century Germanus, bishop of Auxerre, and Lupus, bishop of Troyes, were sent into Britain to refute the doctrines of Pelagius. During their stay in this island the Picts and Scots, bearing that the Roman legion had ties and drove the Britons from the northern to the more southern parts of the Island. POSITION DURING SLEEP. slightly Raise the Head and Lie of the Right Side.

THE PROPERTY.

The main object of sleep is that every organ of the body should have perfect rest. The brain, the lungs and the heart have been, not inappropriately called the "tripod of life," as upon called the "tripod of life," as upon them hangs the prosperity of the whole frame; hence we slightly raise the head to check the flow of blood to the brain and more or leading to the brain and more or less quickly find or the position of greatest ease for lungand heart.

This will be found by sleeping for the greater part of the time on the heart is on the left of the medial line, and the apex points closely to the smaller left lung; hence the fullest and freest play possible should be given to the left side.

A quiet pulse, diminished respiration and refreshing rest are all combined when open windows, moderate warmth and unchasing heart work to gether. It is often best to court sleep on the left ride and turn to the right
